👤 About

I'm Charles, a product designer based in Chicago. I care about making interfaces and interactions that feel simple, clear, and enjoyable, especially in blockchain and AI, where these patterns are still being figured out for the first time.

I'm currently the Lead Product Designer at Stellar; previously at Warby Parker, Uber, and Weebly. Lately I've been writing code through conversation and wiring agents together using Claude Code, OpenClaw, and Paperclip.

🔗 Experience

Stellar · Blockchain for payments	Current
Warby Parker · Lifestyle eyewear brand	2018
Uber · Ride-sharing platform	2017
Weebly · Drag-and-drop website builder	2016
